More than I can tell
You're in my head and in my heart
More than I can tell
I miss you since we've been apart

More than I can tell
I'm longing for your gentle smile
More than I can tell
I wish you were gone just for a little while

Still I feel you're here
How many times your name I spell
More, more, more
More than I can tell

More than I can tell
I think about your lovely ways
More than I can tell
I'm asking why you couldn't stay

Still I feel you're here
How many times your name I spell
More, more, more
More than I can tell

You kissed my lips goodbye
On your wings you fly
Your name became a spell
More than I can tell

Still I feel you're here
So many times your name I spell
More, more, more
More than I can tell
